## Course Outline

This package includes these courses

- Intro to Financial Accounting & Financial Statements (6 Hours)
- Intermediate Financial Accounting (6 Hours)

### Intro to Financial Accounting & Financial Statements

Learn how to analyze financial statements and reports, including income statements, balance sheets, and cash flow statements, and understand essential financial accounting principles and metrics. This course offers hands-on exercises using real-life examples from well-known companies like Facebook, Amazon, and Apple to demonstrate practical application.

- Financial accounting fundamentals, including cash versus accrual accounting and GAAP
- Income statement line items and financial metrics
- Balance sheet: Assets = Liabilities + Shareholders' Equity
- Cash Flow Statement: Cash flows from operations, investing, and financing
- How the financial statements tie together

### Intermediate Financial Accounting

This Intermediate Financial Accounting class will deepen your knowledge of complex accounting principles and prepare you for the challenges of navigating advanced financial reporting scenarios. Build your knowledge of investments, securities, debt accounting, and other complex financial accounting concepts in this class.

- Prepare for complex accounting tasks
- Learn advanced income statement processes
- Handle unusual items and EPS
- Work with deferred taxes and tax journal entries
- Manage intercompany investments
- Understand how debt accounting works
