### Figma Bootcamp

- Create UI (user interface) and UX (user experience) designs for websites, apps, etc.
- Make responsive web designs that are optimized for mobile, tablet, and desktop screens.
- Turn your designs into clickable prototypes that can be shared with others.

### UI Design Bootcamp

- Learn UI design concepts & best practices
- Design webpages and apps with Figma
- Get 1-on-1 help and feedback on your design work so you can learn and improve
- Develop projects for your portfolio to showcase your work as a UI designer

### Web Development with HTML & CSS

- Start building websites by hand-coding HTML & CSS

- Create multi-page websites with text, images, & more
- Learn how to style with CSS
- Upload your files using FTP to make the site live

## Advanced HTML & CSS

- Master important CSS concepts such as positioning, advanced CSS selectors, relative type sizing (px, em, rem), calc(), and much more
- Learn sophisticated styling with multiple background images, transparent color using RGBA, CSS gradients, shadows, and more
- Create animated effects using CSS transitions & transforms

## Flexbox, Grid, & Bootstrap

- CSS Flexbox for laying out and aligning webpage content.
- CSS Grid for an entirely new way to think about laying out entire webpages.
- Learn how to use Bootstrap (which is made with Flexbox) to build out layouts quickly.

## JavaScript for Front-End

- Write JavaScript code to add animation and interactivity to webpages
- Learn the fundamentals of the JavaScript language (variables, loops, arrays, functions, etc.)
- Understand how to use free pre-made JavaScripts to quickly can add many different kinds of common functionality
- Create animated slideshows and build animated image enlargers
- Learn to animate any content within a webpage—including SVG—using GreenSock (GSAP)

## Front-End Tools & Portfolio

- Go from design to coded website, with guidance from an expert developer
- What Git is and how it works
- Installing and setting up Git to track changes in your code
- Using GitHub for collaboration with other developers

## HTML Email Bootcamp

- Learn how to code HTML Email messages that are effective and cross-mail-client compatible
- Build and work with multiple layouts (single or multi-column layouts)
- Gain a deeper understanding about email-friendly HTML/CSS and how to manage various email client issues
- Create responsive emails that work across various devices
- Optimize images and swap graphics for mobile devices
- Use media queries to fine tune mobile styles

## WordPress Bootcamp

- Build websites or blogs with WordPress.
- Install WordPress themes (which control the appearance of a WordPress site) & customize their appearance.
- Use WordPress plugins to add functionality.
- Install WordPress locally so you can write and test your code.

- Learn how WordPress code work behind the scenes and how to use code (HTML, CSS, and PHP) to customize/control it.
